

## **Membership Applicants**

You are cordially invited to join Structural Engineers of New Hampshire (SENH), a not-for-profit organization established to pursue common interests of practicing structural engineers and others sharing an interest in the activities of structural engineers.

SENH is founded on the premise that those in the structural engineering community, through association, can improve and advance the practice of structural engineering for both the individual and the profession. As an organization, SENH promotes the following interests:

- To advance the technical practice of structural engineers through meetings, seminars, and educational programs.
- To improve the professional, business, and administrative practices of structural engineers, structural engineering firms and consultants.
- To advance proper legislation affecting structural engineering practice.
- To establish a network among the members of the Association to communicate information of common interests to structural engineers.
- To cultivate social contacts within its membership, and by closer association and a better mutual understanding, discourage unethical and detrimental practice, and inspire a resolve to act collectively to benefit our profession.
- To serve the public, to encourage the pursuit of excellence in our practice, and to maintain the honor and dignity of our profession.
- To promote issues regarding public health, safety, and welfare.
- To serve as spokesperson to the public on matters of structural engineering.

Each meeting will provide an opportunity to hear a guest speaker or presentation on a relevant topic as well as reports from the Association's various committees. In addition to dinner meetings, webinar education meetings and other social events are held.

SENH members receive our newsletter, which is issued approximately five times each year. The newsletter contains information on upcoming meetings, a summary of past meetings, news, reports from our committees and other news of interest to the structural engineering community.

SENH is a member of the National Council of Structural Engineers Associations (NCSEA). SENH members receive all benefits provided by NCSEA including the quarterly publication *Structures Magazine*.

To be admitted as a member of SENH, fill out the application. Individuals licensed in the State of New Hampshire as professional engineers and who practice structural engineering in the State of New Hampshire are admitted as **MEMBERS** upon application and approval. Individuals who practice structural engineering and who are not otherwise eligible for membership and others sharing an interest in the activities of SENH may qualify for admission as **ASSOCIATE MEMBERS** upon application and approval. **STUDENTS** who are enrolled full-time in an accredited two-year or four-year engineering or technical program, at a school located within New Hampshire, or attending a school outside New Hampshire with permanent residence in New Hampshire, may also qualify for admission.

The SENH Board of Directors look forward to receiving your application. If you have any questions, please do not hesitate to contact any one of the Association directors listed on the Officers and Committee's page of our website, [www.senh.org/officers-and-committees/](http://www.senh.org/officers-and-committees/).
